

Application Brief

Labeling Solutions Pharmaceutical and Biotechnology Industries

Industry:

Pharmaceutical
Biotechnology

Products:

Duratran II polyester label
Duratran II clean room polyester label
Duratran II clean room polypropylene label
Duratran II paper label
Duratherm III paper label
Duratran S label
Duratran Kimdura label

Region: North America

Typical Applications:

- Cryogenic labeling
- Clean room labeling
- Vial and slide labeling
- Autoclavable labeling
- Asset tracking
- Shipping labels

Customer Benefits:

- Consistent tracking for harsh conditions
- Industry-proven solutions currently in use
- Elimination of unreliable handwritten identification
- Broad product range to meet price/performance needs
- Stock items available for quick shipment

Industry Need

The Health Industry Business Communications Council and the American National Standards Institute have developed the ANSI/HIBC standards for packed and item level bar coding for the health care industry. Bar code technology is a proven valuable tool for reducing labor costs, human error and automating data to improve the quality of patient care. Standards for proper identification can be found at <http://www.hibcc.org>. Analytical diagnosis begins with specimen analysis in laboratories that submit samples to extreme conditions such as centrifugal separation, cryogenic freezing or autoclave sterilization.

Extreme applications have been at the core of Intermec's business since the development of the bar code, with solutions ranging from pharmaceutical clean rooms designed for temporary ID to durable military code applications for transcontinental deployment.

Intermec Solutions

Intermec's identification products address the industry's challenging requirements such as resistance to extreme temperatures, sensitivity to particle generation in clean room environments, and label durability when exposed to harsh chemicals. Many common configurations are in stock for quick shipment, ensuring that options are readily available when new demands arise. Custom products can be tailored to more unusual needs. With a comprehensive product set ranging from durable film labels to economical paper options, the right products are available to optimize performance and price across the enterprise.
